

Cranesmart Systems Load Moment Indicator

Load Moment Indicator Features:

- Wireless transmission of information to the panel increases durability of the Cranesmart Load Moment Indicator components.
- Offers unparalleled accuracy and reliability in the industry, with load and angle readings accurate to within +/-1%.
- Meets or exceeds all LMI safety regulations.
- Customizable to fit any crane with special installation instructions for lattice and hydraulic setups.
- Simple installation by the operator gets the equipment functional within an hour.
- All load moment indicator components are specially designed to work together wirelessly through one panel – each component temperature stress tested to efficiency between -40°F to 140°F (-40°C to 60°C) and offer a battery life of 5+ years with free replacement batteries for life.
- Fast load moment indicator deliveries and Cranesmart's number one after-the-sale with on call trouble-shooting and available replacement parts ensure minimal equipment downtime.
- Technical specifications are flexible to meet any customer's specific needs.
- Proven professional engineering, with over 30,000 Cranesmart systems in use around the world.
